

Institutional ERP for colleges and universities

Every register your campus keeps, in one record.

Admission forms, attendance sheets, mark registers, fee receipts, research logs and placement files — one system that every department writes to and reads from.

One student record, from enquiry to alumni reunion

Most campuses run six systems and a dozen spreadsheets. KurippEdu follows the student instead — each stage writes to the same record, so nobody re-enters what the last office already typed.

1

Enquiry and admission

An enquiry becomes an application, a merit list, an allotted seat and a paid fee receipt without the file leaving the system.

Admissions

Merit lists

Fee collection

Document vault

2

Academics and attendance

Timetables, syllabus coverage and daily attendance, with outcome mapping built in rather than reconstructed later.

Timetable

Attendance

CO-PO mapping

Library

3

Examinations and results

Hall tickets, seating, invigilation duty, valuation and revaluation — every mark carrying an audit trail back to who entered it.

Hall tickets

Register numbers

4

Finance and administration

Fee structures, instalments, scholarships, payroll and purchase, all reconciling against the same student and staff records.

5

Research, IQAC and accreditation

Scholars, publications, patents and funded projects feed NAAC, NBA and NIRF reporting straight from live data.

6

Placement and alumni

Drives, eligibility, offers and median salary roll into graduate outcomes — and the record stays open as an alumni profile.
